Claims Allowed

Claims 1-18 are allowable over the prior art of record. The claims are allowed because the prior art does not anticipate nor render obvious the invention of a system including transmission component having a hydraulic transmission link, a transmission controller, an engine controller, the engine and/or transmission controller being controlled by either the engine or transmission controller in response to a detection of a fluid loss or to avoid a hazardous situation from occurring due to a loss of fluid in the hydraulic transmission link.

Prior Art Discussed

The examiner has considered the references cited by applicant in his Information Disclosure Statement filed January 20, 2004. Since no translation of these references was provided, only a limited review of their contents was possible, but neither of them appear to show the claimed invention including the detection of a fluid loss and a subsequent correction to either the engine or transmission controller.

The references cited by the examiner are deemed pertinent to applicant's disclosure. Schaefer '912 shows transmission hydraulic control system that is responsive to fluid level, and consequently, fluid loss, but does not show an engine controller. Ahnert '873 and Judy '972 both show vehicle diagnostic controllers but do not show the controllers being responsive to a loss of fluid in a hydraulic transmission link.

Conclusion

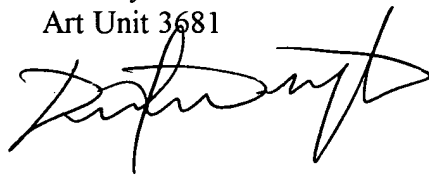

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dirk Wright whose telephone number is 703-308-2160. The examiner can normally be reached on Monday through Friday, 8AM-4:30PM.
